ABCC removes barriers to community sharing

They can pull the ABCD data, process and analyze (N = 11,877)

Researchers want to implement ideas to share with the community

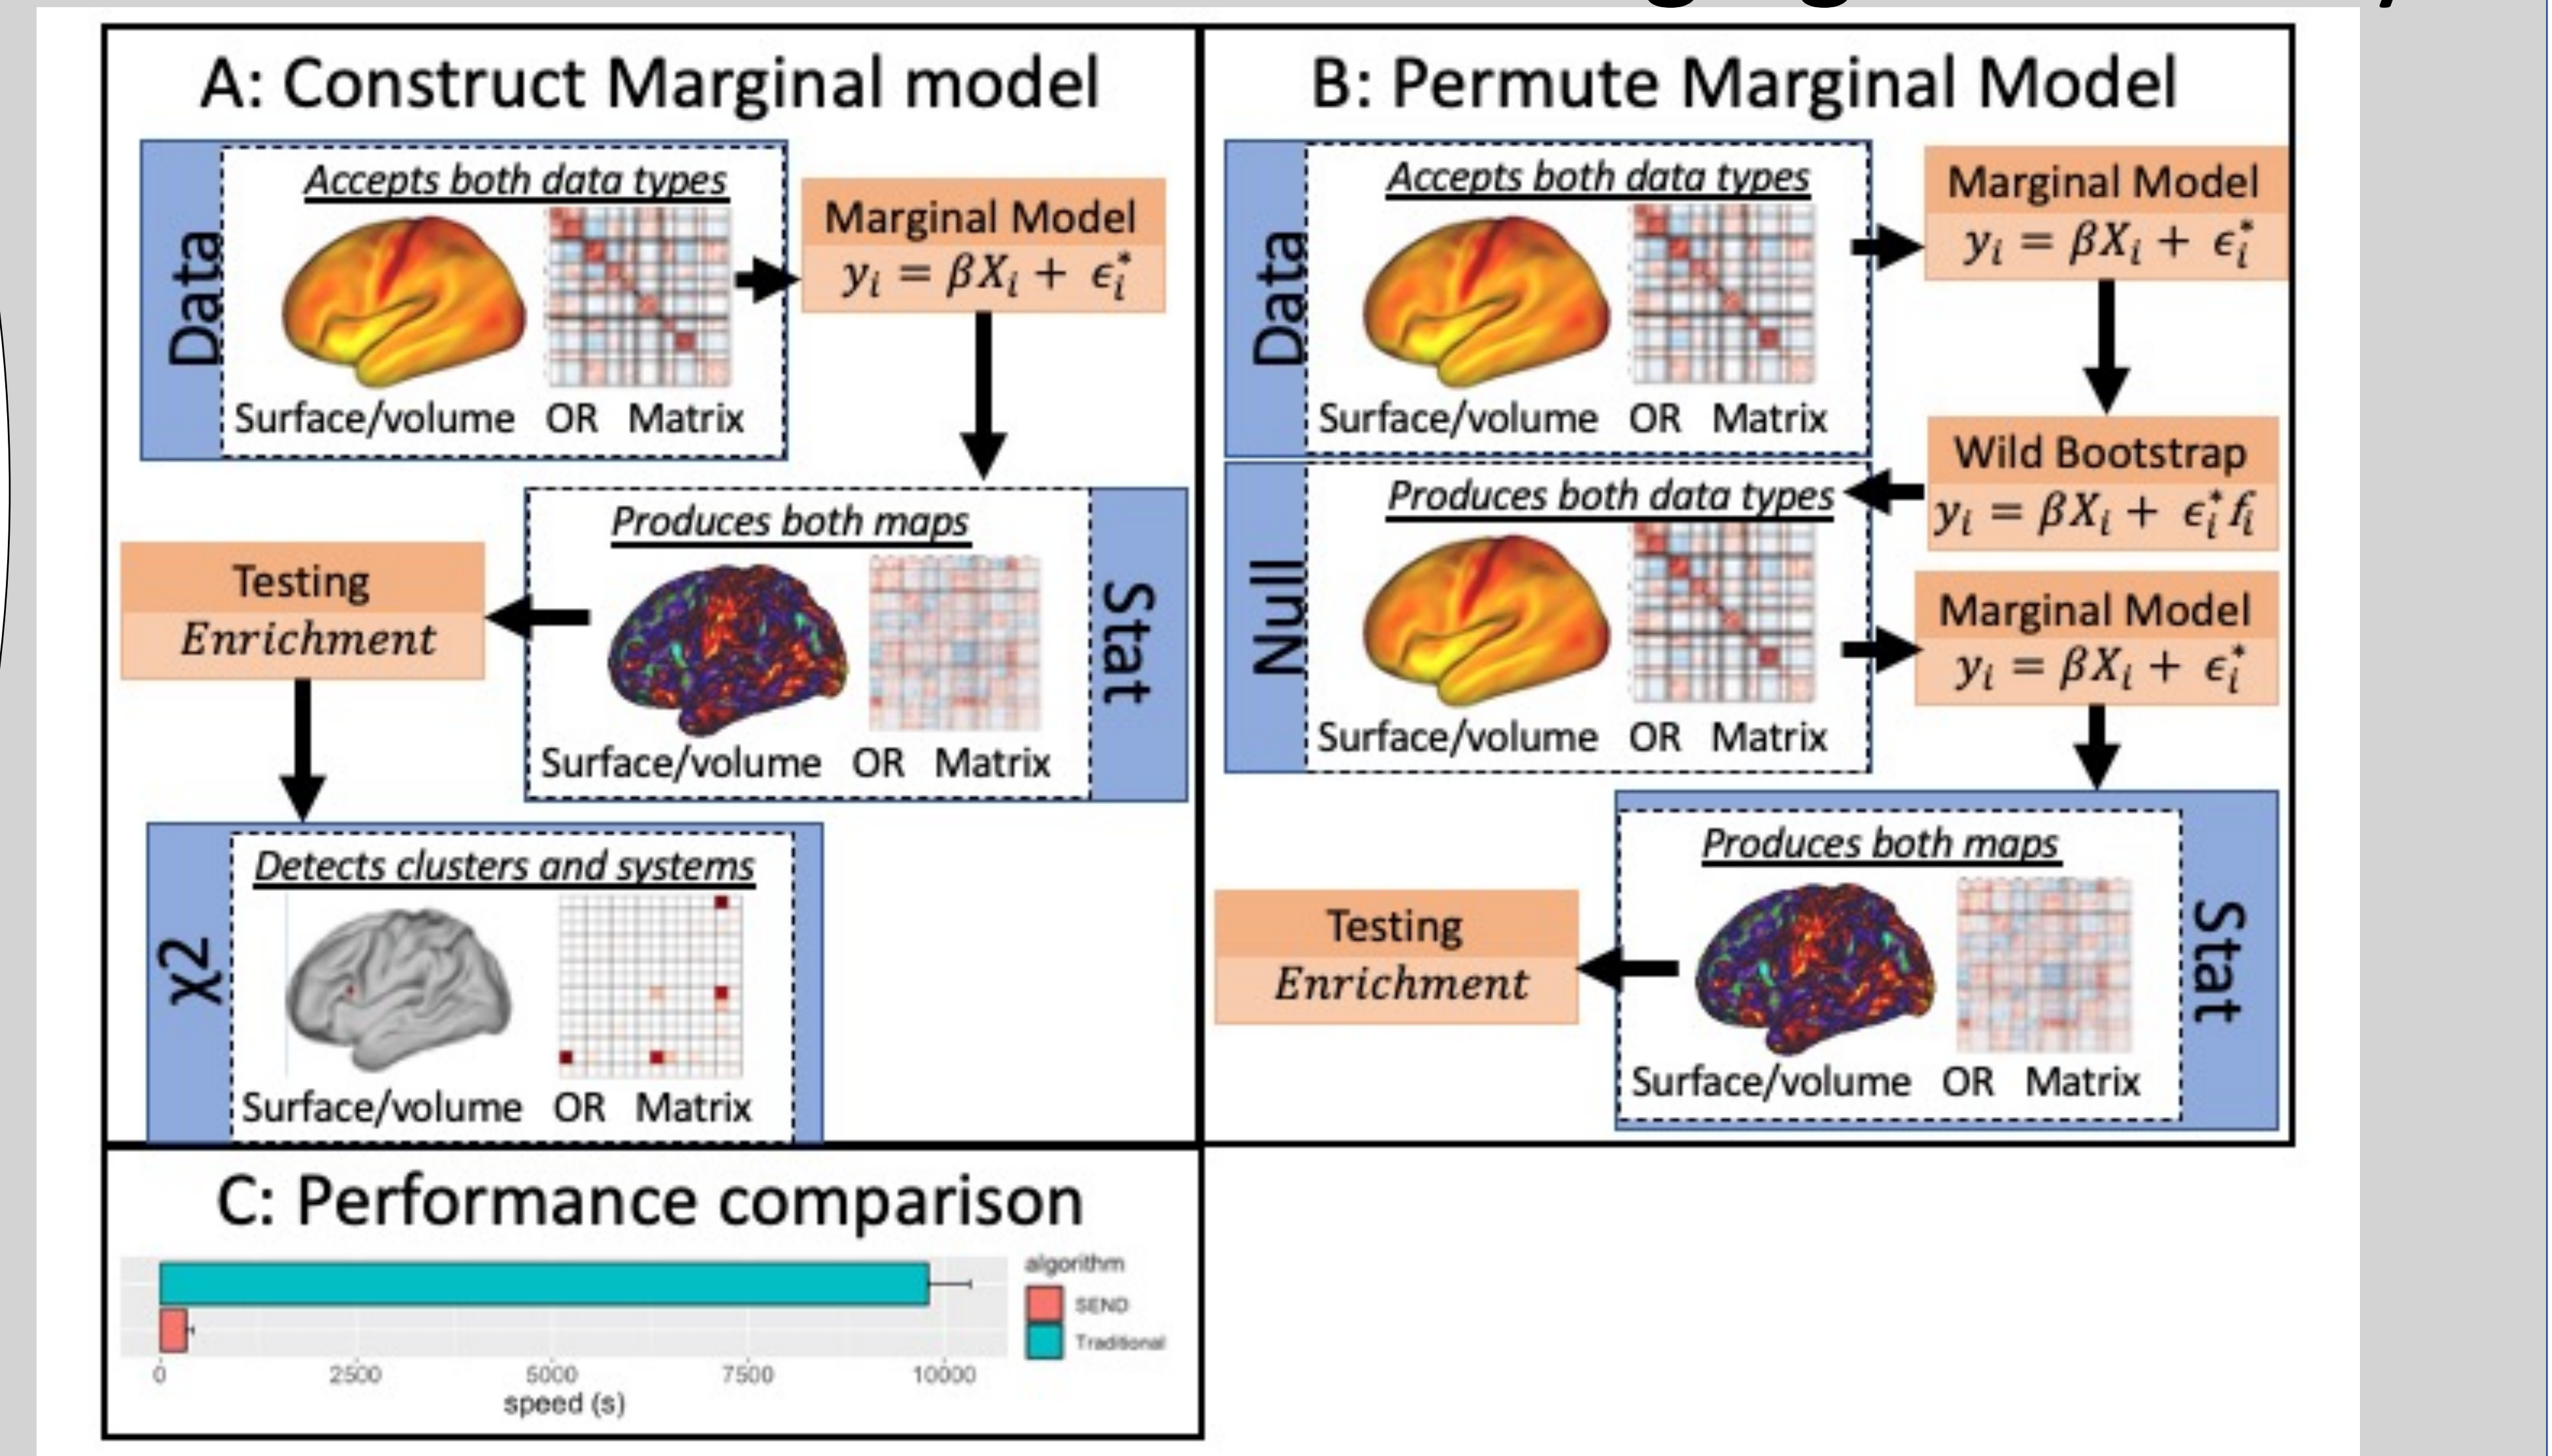

ABCD Reproducible Matched Samples for reproducing analyses

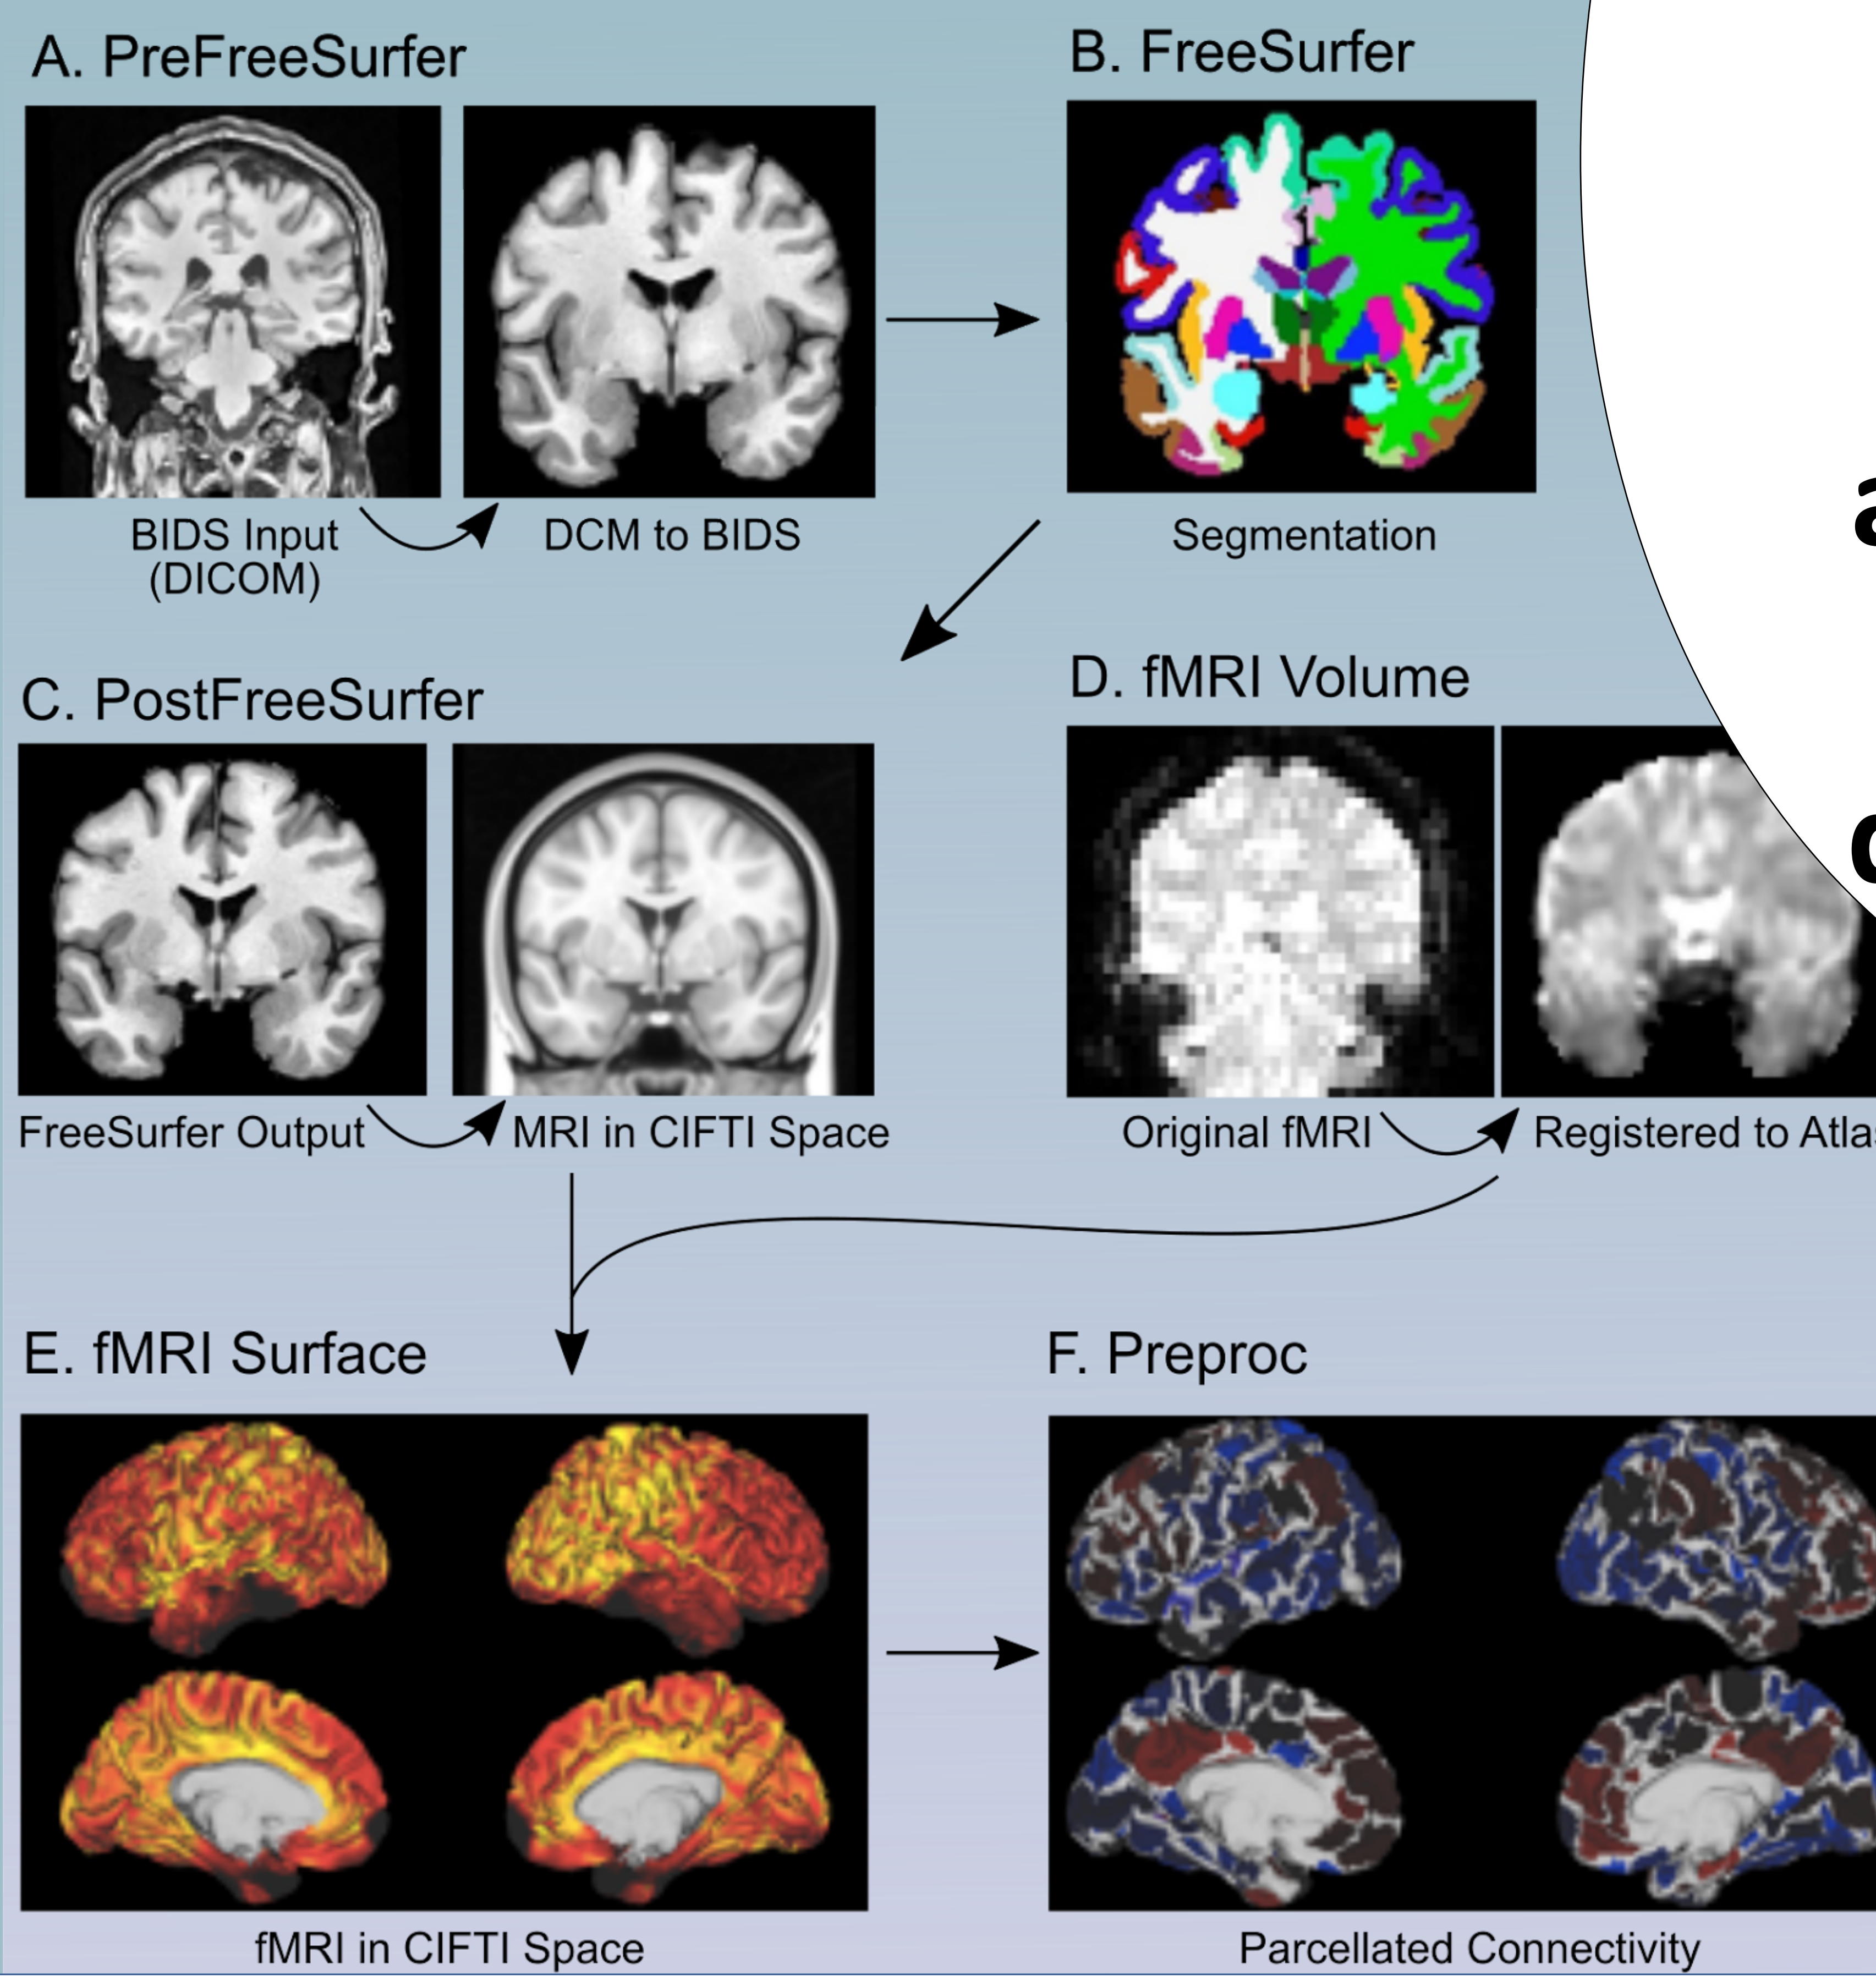

The ABCC enables researchers to access, process, reproduce, analyze, and share ABCD derived data

Sandwich Estimator for Neuroimaging Data analysis

ABCD-BIDS processes ABCD data

3
ABCC data can be accessed through the NDA

Researcher starts by **requesting access** from the NDA

Adolescent Brain Cognitive Development®
Teen Brains. Today's Science. Brighter Future.

(https://nda.nih.gov/user/create_account.html).

Researcher can then **Download the NIH data manifest**

NDA

complete a data use certification (DUC) agreement for access

DCAN Labs S3 downloader can be used to **pull the data from the NDA**

NDA S3 Downloader

<https://github.com/ABCD-STUDY/nda-abcd-s3-downloader>

Data used in the preparation of this article were obtained from the Adolescent Brain Cognitive Development (ABCD) Study (<https://abcdstudy.org>), held in the NIMH Data Archive (NDA). This is a multisite, longitudinal study designed to recruit more than 10,000 children age 9-10 and follow them over 10 years into early adulthood. The ABCD Study is supported by the National Institutes of Health and additional federal partners under award numbers U01DA041022, U01DA041028, U01DA041048, U01DA041089, U01DA041106, U01DA041117, U01DA041120, U01DA041134, U01DA041148, U01DA041156, U01DA041174, U24DA041123, U24DA041147, U01DA041195, and U01DA041025. A full list of supporters is available at <https://abcdstudy.org/federal-partners.html>. A listing of participating sites and a complete listing of the study investigators can be found at <https://abcdstudy.org/investigators/workgroups/>. ABCD consortium investigators designed and implemented the study and/or provided data but did not necessarily participate in analysis or writing of this report. This manuscript reflects the views of the authors and may not reflect the opinions or views of the NIH or ABCD consortium investigators.
